

RAM MEMORIJE

- 31) Најпримитивни блок једног memorije RAM има карактеристика $128\text{ k} \times 8$, ако су на распоредућему memorijekom komponente $8\text{k} \times 8$ бити у склопу DEK 2/4.

Pojedinke:

Потребујено ћете компоненте:

$$8\text{k} \times 8: 8\text{k} = 8 \cdot 1024 = 2^3 \cdot 2^{10} = 2^{13} \Rightarrow 13 \text{ адресних битова}$$

$$N = \frac{128\text{k} \times 8}{8\text{k} \times 8} = \frac{128}{8} = 16 \Rightarrow \text{Потребују сан } 16 \text{ компоненти - компонента } 8\text{k} \times 8.$$

128k x 8: $128\text{k} = 128 \cdot 1024 = 2^7 \cdot 2^{10} = 2^{17} \Rightarrow$ Компоненту коју развијено треба да има 17 адресних битова.

$$K = \left\lceil \frac{17-13}{n} \right\rceil = \left\lceil \frac{4}{2} \right\rceil = 2 \Rightarrow \text{Потребују сан 2 јединице склопа DEK 2/4.}$$

$$M = \left\lceil \frac{N}{2^n} \right\rceil = \left\lceil \frac{16}{4} \right\rceil = 4 \Rightarrow \text{Потребују сан 4 јединице склопа DEK 2/4 у групама од четири.}$$

Скуп један
(1 × DEK 2/4)

Други један
(4 × DEK 2/4)

(32) Наименати блок мень менораже RAM түрінде кандидатта $512 \text{ k} \times 16$ әкелей ыңғашрататын менораже компоненті $16 \text{ k} \times 8$ н әзізгеріп DEK 3/8.

Решение:

- Төсжегійено өзгертіле компонентінде:

DEK $n/2^n$

$$n = 3$$

$$16 \text{ k} \times 8 : 16 \text{ k} = 16 \cdot 1024 = 2^4 \cdot 2^{10} = 2^{14} \Rightarrow 14 \text{ адрессінің үлгіза}$$

- Төс жересінде именаты компонентте $16 \text{ k} \times 8$ де пайдаланылғанда компоненттің $16 \text{ k} \times 16$:

$$512 \text{ k} \times 16 : 512 \text{ k} = 2^9 \cdot 2^{10} = 2^{19} \Rightarrow 19 \text{ адрессінің үлгіза}$$

$$K = \left\lceil \frac{19 - 14}{n} \right\rceil = \left\lceil \frac{5}{3} \right\rceil = 1 \Rightarrow 1 \text{ мүнис DEK 3/8}$$

$$M = \left\lceil \frac{N}{2^n} \right\rceil = \left\lceil \frac{32}{8} \right\rceil = 4 \Rightarrow \text{именаты мүнис } 4 \times \text{DEK 3/8 (гүйін мүнис)}$$

$$N = \frac{512 \text{ k} \times 16}{16 \text{ k} \times 16} = \frac{512}{16} = 32 \Rightarrow \text{именаты мүнис } 32 \times \text{RAM } 16 \text{ k} \times 16$$

$\underbrace{A_{18} A_{17}}_{\text{тінші мүнис}}, \underbrace{A_{16} A_{15} A_{14}}_{\text{2-нші мүнис}}, \underbrace{A_{13} A_{12} \dots A_0}_{\text{3-нші мүнис}}$
